

Fraudulent “Proof” of Evolution by Dave Nutting

Clear back in 1957, the famous Dr. Spock was totally taken in by a false “scientific fact.” Dr. Spock wrote, “Each child as he develops is retracing the whole history of mankind, physically and spiritually step by step. A baby starts off in the womb as a single tiny cell, just the way the first living thing appeared in the ocean. Weeks later, as he lies in the amniotic fluid of the womb, he has gills like a fish.” (B. Spock, *Baby and Child Care*, p. 223, Cardinal Giant Edition, 1957 as quoted by David Menton in the DVD, *Fearfully and Wonderfully Made*, 2004).

Can you believe it? This false idea was based on Haeckel’s fraudulent work which had already been disproven about 50 years before that! Decade after decade,

the same false and very deceptive argument for evolution has been handed down. In fact it is still in the textbooks used today! Let’s set the record straight.

Fiction: Fetus has Gill slits.
Truth: Baby does not have gills or slits!

There is no oxygen transfer. Pharyngeal pouches develop into the:

- Ear canal and part of the middle ear.
- Eustachian tubes, thyroid/parathyroid glands, and other structures in the neck and jaw region.

Why call these important structures gill slits, yolk sac, and a tail, unless someone is trying to deceive you into believing you evolved from a fish? Think about it and pass this article on! **AOI**

Fiction: Fetus has a yolk sac like a fish.

Truth: Baby has no yolk sac!

- “Yolk” sac makes baby’s first blood
- “Yolk” sac doesn’t contain yolk.
- Baby gets its food from it’s mother.

Fiction: Fetus has a tail.
Truth: Baby has no tail!

- It is the end of the spinal column!
- It is crucial for muscle attachment and upright stance.
