MEMORY VERSE
 ... LORD, THOU *ART* GOD, WHICH HAST
 MADE HEAVEN, AND EARTH, AND THE
 SEA, AND ALL THAT IN THEM IS:
 Acts 4: 24 (KJV)

THE MISSING LINK

Evolution teaches that all life came from "goo." From that "goo" came the first "simple" cell, which then evolved or changed into all the living things we see in the world today: the plants, the insects, and the animals, including man. (They think man is an animal.) Have you ever seen a picture like this in any of your school books, in a museum, or a magazine? It is an evolutionary chart showing life's "family tree."

You might notice the picture shows that a fish changed into a reptile creature, which changed into an amphibian type creature, which changed into a mammal, which changed into a man! According to evolution, when you sit down and eat a fish, you are eating one of your ancestors (a cousin maybe?) Yuckk! What an idea!

One of the evolutionary "stories" is that of a salamander. Evolutionists believe that millions of years ago, a salamander was born that was different from other salamanders. This new salamander was a mutation or a transitional form. Why did this change take place? Evolutionists don't have the answer, but they believe that this new form was somehow better at

living than the salamanders before it. After long periods of time, this new creature once again evolved into yet another creature. This happened over and over until finally a rat was born. This story tells us that the salamander (an amphibian) evolved into a rat (a mammal)! Quite a story, right? But there are some BIG problems

with this idea!

Sometimes when we dig into rocks, we find bones that have turned to stone. We call these bones

fossils. From fossils we understand that the animals that the bones belonged to existed in the *past* at some time. Fossils of both the salamander and the rat have been found, so we know that they both

existed in the past at some time. But what about those transitional forms or mutations of the salamander, do they exist? NO! No one has ever found any fossils of these imaginary creatures. Nothing! These

transitional forms are called the "missing links". Why do we say they are "missing"? Because they aren't there! They don't exist! Yet if Evolution is true we *MUST* see these changes, either happening in the past or happening today. We don't see any "half" creatures (transitional forms) in the fossils, so we know they didn't happen in the past. So then we should see some of these "half" creatures today, right? Wrong! We don't see any "half" animals now either. So if we can see no evidence or proof of evolution, why believe in it? God said, "Let the earth bring forth the living creature after his kind, cattle, and creeping thing, and beast of the earth after his kind: and it was so." Genesis 1:24. That's what we see from the past and what we see today, whole animals after their kind. No half-critters! God is the Creator of all life!

Thanks to the Duffield Family from Ft. Morgan, CO, who shared this riddle:

*The beginning of eternity,
The end of time and space,
The beginning of every end,
The end of every place.
What am I?*

WHALE THAT WALKED?

In 1983 evolutionists said they had found 50-million year old fossils of a creature that lived on land, was about 6 feet long, and was the "missing link" between whales and land animals. This "whale" that they said could walk on land was named *Pakicetus*. They thought it lived and bred (had babies) on land, but ate in shallow water. Can whales do that? No! So how do evolutionist know so much about *Pakicetus*? They

must have found a big pile of bones (fossils), right? Well not really. What they did find was a small bone they guess was probably part of the skull, two pieces of jaw bone, and a few teeth. That's all! Do you see a problem? How can you tell if a creature (a creature you're not even sure existed) walked on land when all you have is a few teeth to look at? No way! That is really stretching the evidence. When people see a picture like this though, they think it must be true. But is it? No! This picture of *Pakicetus* is **ARTWORK!**

*Jesus loves the little children
all the children of the world
that the cow turned into whale
is an evolution tale
Jesus loves the little children of the world*

ASK EUGENE

Wow! Can you imagine it, half-critters! What would you get if you crossed a cat and a parrot? Give up? *A purr-a keet!* Ha, ha! You try it. Try to match the combinations on the left with what you might call it on the right.

- | | |
|-----------------------------------|--------------------------------|
| 1. electric eel + sponge | a. caterpillar |
| 2. cow + chicken | b. milkshake |
| 3. raccoon + kangaroo | c. bugs bunny |
| 4. cow + pogo stick | d. fur coat with pockets |
| 5. pig + Christmas tree | e. porky pine |
| 6. porcupine + young goat | f. grease monkey |
| 7. old car + gorilla | g. croak-a-cola |
| 8. insect + rabbit | h. stuck-up kid |
| 9. worm + fur coat | i. 10,000 pound
know-it-all |
| 10. parrot + army man | j. flying car-pet |
| 11. elephant + computer | k. shock absorber |
| 12. sheep + chocolate candy | l. roost beef |
| 13. frog + soft-drink | m. orangu-tang |
| 14. breakfast drink + monkey | n. parrot-trooper |
| 15. airplane+
automobile + dog | o. Hershey baa |

JUST FOR FUN

Use your imagination. Most evolutionists believe a whale evolved from a cow! Draw a cow. Then draw several pictures to show how that cow might turn into a whale. Do you think something like that could actually happen? Send your pictures to Eugene.
