Another example can be found in your bedroom. How many of you have to clean your bedroom?

I do too, and sometimes my room is so messy that it takes almost all day to clean it up.

What happens, just 5 minutes after you get the room cleaned? It begins to get messy again! – All by itself it seems!

Evolution teaches that you can add raw energy to a system and that system will go from disorder to order. What we actually observe is just the opposite of this evolutionary idea. Without outside information and energy, everything tends to go from a state of order to a state of disorder. If you open the window and let the sun shine in, will it clean up your room for you? No, raw energy is not enough. It requires energy (or “kid power”) and intelligence. In general, we find that order over time moves to disorder, which works against the idea of evolution.

It takes intelligence to create. “And, Thou, Lord, in the beginning hast laid the foundation of the earth; and the heavens are the works of thine hands: They shall perish; but thou remainest; and they all shall wax old as doth a garment;” Hebrews 1: 10-11.
